SUPPORTING PUPILS WITH MEDICAL CONDITIONS POLICY

Policy approved: Autumn 2025
Policy review: Autumn 2028

1. **Overview**

Our school places the highest importance on the care, safety, well-being and health of our pupils and staff especially those with known medical conditions. This policy had been written to give clear guidelines about the appropriate action to be taken where a pupil is admitted to school with an identified medical condition or when any child or adult is unwell or has an accident. It should be read in conjunction with the Medicines Policy, the Asthma Policy, Intimate Care Policy, Health and Safety Policy, Additional Needs Policy where appropriate and Educational Visits Policy and the DfE guidance 'Supporting Pupils with Medical Conditions' Sept 2017.

2. **Objectives**

- To ensure that good, effective and appropriate care is provided when a child is admitted to school with an identified medical condition or when any child or adult is unwell or has an accident in school or on a school occasion.
- To ensure that the DfE guidance 'Supporting pupils with medical conditions' (Sept 2017) is known, understood and followed and to ensure that appropriate training is provided for all staff and particularly for those with the care of pupils with medical conditions in line with DfE guidance (Sept 2017).

3. **Entitlement**

Our school accepts that pupils with medical needs should be assisted if at all possible and that they have a right to the full education available to other pupils. We believe that pupils with medical needs should be enabled to have full attendance and receive necessary proper care and support.

We accept all employees have rights in relation to supporting pupils with medical needs as follows:

- choose whether or not they are prepared to be involved;
- receive appropriate training;
- work to clear guidelines;
- have concerns about legal liability;
- bring to the attention of leadership any concern or matter relating to supporting pupils with medical needs.

4. **Expectations**

It is expected that:

- parents will be encouraged to co-operate in training children to self-administer medication if this is practicable and that members of staff will only be asked to be involved if there is no alternative;
- where parents have asked the school to administer the medication for their child they must ensure that it is in the original container as dispensed by the pharmacist including instructions for administration, the dosage regime should be typed or printed clearly on the outside and storage instructions must be evident. The patient's name and the name of the pharmacist should be visible. School will only accept medication that is in-date and labelled in this way (exception is insulin which may be in a pen or pump but must still be in date). Any medications not presented properly will not be accepted by school staff. Pupils should not bring in their own medicine. This should be brought into school by the parent/carer.
- that the school will consider carefully their response to requests to assist with the giving of medication or supervision of self-medication and that they will consider each request separately.
- the school will liaise with the School Health Service for advice about a pupil's special medical needs, and will seek support from the relevant practitioners where necessary and in the interests of the pupil.
- Any medicines brought into school by the staff e.g. headache tablets, inhalers for personal use should be stored in an appropriate place and kept out of the reach of the pupils. Any staff medicine is the responsibility of the individual concerned.

5. **Strategies**

- Where a pupil is admitted to school with a medical condition, the school will liaise with parents, carers, relevant medical, clinical and other appropriate authorities to ensure that the child's individual needs are met, a Health care plan (See section 6) is co-created with parent/carers and then shared with appropriate adults, and that they are given full access to the education provided for all pupils.
- The Head teacher will make teachers and others who care for a pupil with a medical condition, aware of the medical condition and its needs and levels of care and support that are to be provided.
- Appropriate training will be provided for all staff and particularly for those with the care of pupils with medical conditions in line with DfE guidance (Sept 2014).
- If any pupil including those with known medical conditions, is unwell in class or has an accident in school, the Head teacher and/or first aider (or if the situation occurs out of school – the teacher in charge) will assess the pupil and decide on the appropriate action which may include giving care and first aid or calling for an emergency ambulance if a pupil is seriously unwell or injured or their known medical condition is causing concern.
- In the event of a serious medical emergency requiring hospital treatment, an ambulance should be called immediately and the patient should be cared for by staff until medical help arrives.
- In the event of a child in Reception having an accident in school (for example when attending our Breakfast Club), staff should always seek the help and support of a Paediatric Trained First Aider (PTA) if available who will then treat the child appropriately. In the absence of a PTA, the pupil should be cared for by staff until medical help arrives.
- A pupil's parents will be contacted as soon as possible, whenever there is a medical emergency or if a pupil has a serious accident. Where appropriate, the school will ask the parent/guardian to attend to support the pupil. Parents must always be notified if a child has a head injury, however minor it may appear at the time. In this school a 'Head Bump' letter is given to the child to take home for the parent to sign and return to school and staff may make a phone call to the parent/carers to inform them.
- If in an accident or medical emergency, bodily fluids need clearing up the site staff will be called to deal with the matter. In their absence, a First Aider will do this.
- The Accident Book (for recording accidents and other medical emergencies) must be completed by the First Aider dealing with the injury/accident in conjunction with the member of staff who is present at the scene of an accident or medical emergency.
- If the child or adult is sent home or attends hospital as a consequence of an accident an HS1 form (online portal) must be completed by the member of staff present at the accident and approved by the Head teacher, or in their absence the Deputy Head teacher, and sent to Trafford's Health and Safety Unit, Stretford Town Hall, Talbot Road.
- If the injured person is a member of staff, they are responsible themselves for completing the form and the Accident Book.
- If an accident or medical emergency occurs off the school premises the member of staff present should complete the HS1 Accident Form or Accident Book as soon as possible after returning to School.

- The teacher in charge of any outing off the school premises has the responsibility for being acquainted with any specific medical needs or conditions of the pupils in his/her charge and have appropriate training in how to care for the child's subsequent medical needs.
-
- Risk assessments must be carried out for all pupils especially those with known medical conditions on each trip. Prior to educational trips and visits, parents will be asked to complete a Consent Form and provision will be made to meet all risks and cover medical needs.
- In the event that an accident occurs out of school and the family cannot be contacted, at least one member of staff should accompany the person to hospital. In no circumstances should any pupils be left unattended as a result of a member of staff accompanying the injured person to hospital; in this instance, an ambulance should be called.
- Staff planning educational visits or journeys, should consider the level of First Aid cover that will be required and the specific support needed by pupils with known medical conditions.
- A designated teacher will be given overall responsibility for the care of pupils with known and identified medical conditions. In this school the Head teacher has the responsibility and will ensure that whenever the school is notified that a pupil has a medical condition:
 - sufficient staff are suitably trained
 - all relevant staff are made aware of a child's condition
 - cover arrangements in case of staff absence/turnover is always available
 - supply teachers are briefed
 - risk assessments for visits and activities out of the normal timetable are carried out
 - individual healthcare plans are monitored (at least annually)
 - transitional arrangements between schools are carried out
 - if a child's needs change, the above measures are adjusted accordingly
- Where children are joining our school at the start of a new academic year, these arrangements should be in place for the start of term. Where a child joins mid-term or a new diagnosis is given, arrangements should be in place as soon as possible, ideally within two weeks.

6. Healthcare Plans

Any pupil with a medical condition requiring medication or support in school should have an individual healthcare plan which details the support that child needs. If the parents, healthcare professional and school agree that a healthcare plan is inappropriate or disproportionate, a record of the child's medical condition and any implications for the child will be kept in the school's medical record and the child's individual record.

The following information should be considered when writing an individual healthcare plan:

- the medical condition, its triggers, signs, symptoms and treatments
- the pupil's resulting needs, including medication and other treatments, times, facilities, equipment, testing, dietary requirements and environmental issues
- specific support for the pupil's educational, social and emotional needs
- the level of support needed including in emergencies
- who will provide support, their training needs, expectation of their role, confirmation of their proficiency and cover arrangements
- who in school needs to be aware of the child's condition and the support required
- arrangements for written permission from parents and the head teacher for medication to be administered by a member of staff or self-administered (children who are competent should be encouraged to take responsibility for managing their own medicines and procedures, with an appropriate level of supervision)
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate
- confidentiality

- what to do if a child refuses to take medicine or carry out a necessary procedure
- what to do in an emergency, who to contact and contingency arrangements
- where a child has a Learning difference but does not have an Education, Health and Care plan, their special educational needs should be mentioned in their individual healthcare plan

The Governing Body oversees this policy and reviews it on its effectiveness.

7. Conclusion

This policy will ensure that where a child has a medical condition or where a child or adult is unwell or has an accident in school or on a school occasion, they are appropriately supported and cared for. It will ensure that the school does all that it reasonably can to give all pupils including those with a known medical condition full access to the education provided.
